Knowledge Organiser: The Great Fire of London

Year 2 Term 1.1 History

Important Topic Vocabulary London The capital city of England. bakery A special shop where bread and cakes are made. cathedral The main church in a city. They are normally very large and can hold many people. fire service A group of people who are trained to safety put fires out. fire hook A tool used to pull buildings down during a fire.

What should I already know?

I should know that firefighters are people who help to keep us safe.

I should know that Florence Nightingale was a famous nurse who helped show nurses how to look after people who are sick.

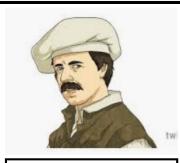

When something has been so badly damaged it cannot be used.

Key People

Samuel Pepys

During the Great Fire of London Samuel Pepys wrote in his diary every day. His diary is the most accurate account of the fire that we have today.

Thomas Farynor

Thomas owned the bakery where the fire started. He managed to escape from the fire with his family. Sadly, his maid did not.

King Charles II

King Charles II was the king during the time of the fire. He asked people to pull down the buildings to stop the fire from spreading.

Sticky Knowledge

- The Great Fire of London started on 2nd September 1666.
- Buildings were made of wooden timbers and were built closely together so it was easy for fires to spread.
- The fire started in the shop that belonged to Thomas Farriner on Pudding Lane.
- The fire burned for four days.
- Firefighting was very simple in 1666. They used leather buckets, fire squirts, fire hooks and axes to stop the fire.
- Buildings had to be made out of stone and brick to stop a similar fire from happening again.

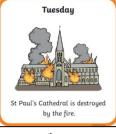

The Great Fire of London began on the 2nd of September 1666 and burned for 4 days. It destroyed many buildings, including St Paul's Cathedral. It began in Thomas Farynor's bakery on Pudding Lane. The fire quickly spread all over London because the weather was warm and windy. The buildings were made of wood and straw and burnt very easily. All the buildings were also built very close together so the fire spread quickly. People used leather buckets and water squirts to try and put the fire out. Unfortunately, this did not work. King Charles II ordered people to pull the buildings down with fire hooks and asked the Navy to use gunpowder to blow up some of the buildings. This stopped the fire from spreading from building to building. Finally, on Thursday 6th September, the wind stopped blowing so people could put the fires out. Sadly, much of London had been destroyed and many people were left homeless.

The Great Fire of London Timeline – September 1666

Sunday 2nd September

Mid Sunday morning run to escape from its path

Sunday evening attempt to stop the fire spreading Monday 3nd September

Tuesday 4th September

Wednesday 4th September

Wednesday

The fire starts to burn more slowly

as the wind dies down

Thursday 4th September

Suggested Activities

- Bake some bread just like Thomas Farynor, you can find lots of recipes on the internet.
- Paint a picture of the fire using lots of bright colours.
- Write a diary as if you were alive during the Great Fire of London.
- Research how the fire service has changed since the Great Fire of London.

Another Fire in London!

It is important to realise that The Great Fire of London is not the only fire to ever happen in London. During your lifetime, on 14th June 2017, the Grenfell Tower fire took place.

The fire spread very quickly throughout the building and unfortunately killed 72 people, and injured many more. However, unlike The Great Fire of London the Grenfell Tower fire did not spread to any other buildings or places in London. This was because buildings are no longer made of wood, like they were during the Great Fire of London, as wood burns very easily. Firefighters now also have better equipment to fight fires and wear special clothing to protect themselves.
