

Art and Design Whole School Overview

In Art and Design, children will learn about some of the world's famous artists. They will learn about the different techniques that have been used in the artwork that these famous artists have created. Children are taught the knowledge and skills to experiment, invent and create their own works of art, craft and design. The skills and knowledge that children will develop throughout each art block are mapped across each year group and throughout the school to ensure progression. The emphasis on knowledge ensures that children understand the context of the artwork, as well as the artists that they are learning about and being inspired by. This enables links to other curriculum areas, including History and Geography, with children developing their knowledge of individual artists as well as individual works and art movements. The emphasis on skills means that children are given opportunities to express their creative imagination, as well as practise and develop mastery in the key processes of art: drawing, painting, printing, textiles and sculpture. The school's art curriculum is supported through the availability of a wide range of quality resources, which are used to support children's confidence in the use of different media.
