Space

Burnley Brow Community School

What should I already know?

-That the moon can be seen at night.

The Moon

The moon can be seen at night but sometimes during the day too. The moon can look a little different every day.

America

-America is a country in the continent of North America. It is also referred to as the United States of America (USA).

-NASA is in America because it's location on the Earth helps to give rockets extra speed when they take off.

Apollo 11

On the 16th July 1969 NASA sent a team to space on a rocket called Apollo 11. The astronauts Neil Armstrong and Buzz Aldrin became the first humans to walk on the moon.
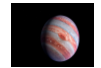

Important Words -

space -the area beyond the Earth's atmosphere.

planet- a large round object in space that moves around a star. The Earth is a planet.

rocket- a space vehicle shaped like a long tube.

moon- the object you can see in the sky at night.

Astronaut- a person who is trained to travel in spacecraft.
